Practical work on Availability Regions and Zones

1) Azure regions

- How many regions does the Azure cloud platform currently cover? Answer: _____
- List the 10 regions that you think are closest to your current location in order of proximity (closest first). For each one, indicate the number of availability zones (AZ).

[illegible]

Practical work on Availability Regions and Zones

2) Performance of Azure regions

- a) Choose 3 Azure zones, one near you and the other two far from your location, and test latency, upload speed and download speed.

Region	Average latency (ms)	Upload speed	Download speed

Tip: look at the cover page of the statement
